

aries series

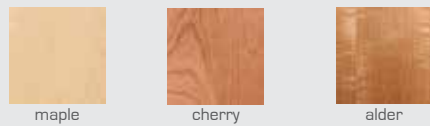

We offer three wood veneer species: maple veneer, cherry veneer and alder veneer, with two finish types: clear, stain, and over 20 finish color options.

All doors can be custom made to order with specific desired veneer species, finish type and color.

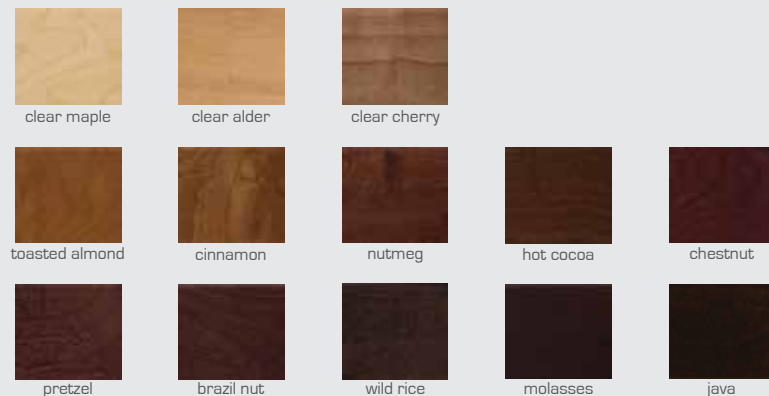

customize door

Step 1: Pick your wood veneer species

Step 2: Pick your finish

shinnoki series

material origin: Belgium  price index: \$\$\$

Shinnoki prefinished panels are made of a top layer of veneer, with a high quality MDF core. This range of wood veneer panels does not need any further finishing.

- »»» prefinished real wood veneer
- »»» well managed forest, FSC® certified
- »»» consistent colors and quality thanks to the mixmatch technique

edge band option:

Double-sided

Shinnoki panels are finished the same on both sides with the Shinnoki design and protection technology.

A genuine wood top layer

The top layer of Shinnoki is a sheet of real wood veneer, assembled according to our unique mixmatch technique. The surface is gently brushed, stained and lacquered with a soft-touch acrylate urethane lacquer. The result is a pleasant touching surface where the protection, the natural feel and exclusive appearance of the wood are well-balanced.

What is mixmatch?

Mixmatch is a technique in which we joint wood veneer sheets together that come from different trees and have been cut in different ways. The effect is the natural appearance of solid wood. When a continuous surface is created using different boards, there are no visual breaks in the pattern. Just as with solid wood, every board is different, but they still belong together. The result is a finished sheet with a lively look and uniform quality.

aries series

material origin: U.S.A. price index: \$\$ - \$\$\$

Smooth lines make the Aries a sleek and beautiful choice for a contemporary kitchen. The thin wood edgeband lining the sides of the doors is nearly undetectable. Additionally, this veneer door is available with FSC certified materials or in a diverse variety of color and grain options of environmentally friendly reconstituted wood veneers.

neo collection | 2 series

The Neo collection features a wood veneer slab door design, it offers a sleek look while maintaining the natural beauty of wood. Veneer refers to thin slices of wood, is applied to an engineered substrate core such as an MDF (medium-density fiberboard) panel, providing strength, durability and stability.

The Neo collection has two series:
